

COMTEST® AUTOMATION SYSTEM

ComTest® is an advanced measurement and control system for powertrain testing, vehicle development and component testing. ComTest® is a flexible and cost-efficient tool designed to fit a wide variety of applications.

EXAMPLES OF APPLICATIONS:

- Engine Development
- Component Testing
- Chassi Testbeds
- Transmission Testing
- On-Road Testing
- Power Plants

About ComTest®

ComTest® is an advanced measurement and control system for powertrain testing, vehicle development and component testing. ComTest® is a flexible and cost-efficient tool designed to fit a wide variety of applications. We represent over 30 years of experience developing automation systems, with hundreds of ComTest® systems delivered and installed at leading companies in the automotive, energy and other industrial sectors. We will support you all the way from the specifications to the final system commissioning, and our customized service & support will make sure that your testing system will have a long and productive life-span.

In need of an automated high-performance dynamic test cell, or a reliable, low-cost cell for durability or component testing? We are able to provide you with a test application of the highest quality, and we look forward to your order or inquiry.
