

## THE COMTEST® ARROW

The ComTest® Arrow is a complete solution for test-bed systems, consisting of five separate modules.

1. The Test Planning module is a workflow-based planning system. Its main purpose is to plan and track the test objects.
2. The Test Preparation system prepares one or more tests for a testbed family. This module also provides the long-term storage of the test result.
3. The Testbed performs the test on the test object.
4. The Test Validation module confirms that the completed test is valid.
5. The Report and Export module presents the test result and produces (exports) a report.

## KEY PROPERTIES

- All databases are ASAM ODS compatible.
- All GUI is web-based except for the run-time GUI in the testbed.
- Active Directory support with single sign-on.
- Oracle, SQL Server or SQLite database support.
- Test object and I/O object in different databases.

## COMTEST® ARROW FEATURES

- ASAM ODS, MDF Based
- Web GUI
- New Test Planning Module
- New Validation Module
- Split of the Test and Prepare Module
- Web Based Reporting Module
