OPTIMIZE YOUR TESTING WITH COMTEST®

ComTest Mobile - a ready-to-use measurement and control system for mobile test applications.

Ready-to-use

Our ready-to-use concept makes setting up a simple test application easy. Configure your system by using ComTest Mobile's toolbox, start recording, and then choose the powerful presentation tools to display the testing progress in real time. Once the test is finished you can easily evaluate the result and create reports and analyses.

Flexible and expandable

ComTest Mobile is a flexible stand-alone system. When creating your specific application, you can define your own structure for administrative data and configure your parameters from I/O or calculated parameters. You can then define your application's individual user interface, and export your data in a wide range of formats. The powerful backup function ensures fast and reliable storage and recovery of your data.
