

**ADVANCED ENGINEERING SERVICES  
- KEEP YOUR TEST SYSTEM UP-TO-DATE**

***With our Advanced Engineering Services, you can continually improve and develop the functionality of your ComTest® application. We will make sure that you get the most out of your test system, and provide assistance if you want to add new functionalities to it.***

**OPTIMIZE YOUR TESTING WITH  
COMTEST®**

***Advanced Engineering Services -  
Keep your test system up-to-date***

**Keep your test system up-to-date**

ComTest is a well-proven and powerful test platform used in a wide range of test applications.

The ComTest product architecture is based on proven core software which, when combined with customer specific applications, offers unique customer values: proven functionality, rapid development and a high degree of customization.

ComTest offers unique flexibility through its open high level test command language – TCL. Calculations and test control can easily be updated and/or added if needed.

With our Advanced Engineering Services, you can continually improve and develop the functionality of your ComTest application. We will make sure that you get the most out of your test system, and provide assistance if you want to add new functionalities to it.

**SERVICES**

Examples of services we provide to keep your system up-to-date:

- New instrumentation
- Adaptation to new legal regulations
- Development of new testing methodology
- Addition of new presentation views
