

WSP TESTING TECHNOLOGY *Instrumentation & control*

INSTRUMENTATION & CONTROL

Instrumentation & Control provides consulting services in electrical design and PLC programming. We have many years of experience working with the nuclear, automotive and various other industrial sectors.

Our services

Instrumentation & Control provides consulting services in electrical design and PLC programming. We have many years of experience working with the nuclear, automotive and various other industrial sectors. As such, our electrical design and automation teams know the importance of high quality and keeping deadlines.

Electrical and programming design

We are able to provide experienced designers for projects of various size and complexity. We provide support and resources for our own projects as well as those of other customers (if requested).

CAD tools

We work with ELPROCAD primarily, but also have extensive experience working with AutoCAD and Elmaster.

Programming software

We work with Siemens S7/Tia Portal primarily, but also have extensive experience working with other well-known software.
