

TECHNICAL ROADMAP INVESTIGATION

WSP offers consulting services in order to help our customers solve their most challenging technical issues. We are able to provide strategic consulting as well as economic and/or technical investigations.

Strategic Advice

At WSP, we work with our customers in order to develop solutions that remain useful over time. If you are challenged by a complex and difficult issue, we are here to help you with our insight, perspective and advice.

Roadmap

Roadmap plan studies provide concise plans, a clear presentation of options and a basis for future investments. A roadmap is an important basis in order for testing industrial company management to get an overview and a detailed analysis of the impacts of potential future scenarios. It is a robust business process which summarizes and analyzes the options, and assesses opportunities and risks in terms of both investment costs and life cycle costs. A site roadmap is usually made with a 10-year-perspective in mind.

SERVICES

We execute assignments and projects in the following project phases:

- Project management
- Planning management and coordination
- Preparing specifications of requirements in collaboration with customers
- Designing layouts
- Preparing process solutions and P&I diagrams
