*Strategic Advice  
and Investigations*

### STRATEGIC ADVICE AND INVESTIGATIONS

***WSP offers consulting services in order to help our customers solve their most challenging technical issues. We are able to provide strategic consulting as well as economic and/or technical investigations.***

### Services

WSP offers consulting services in order to help our customers solve their most challenging technical issues. We are able to provide strategic consulting as well as economic and/or technical investigations.

At WSP, we work with our customers in order to develop solutions that remain useful over time. If you are challenged by a complex and difficult issue, we are here to help you with our insight, perspective and advice.

### Site Master Plan

Site master plan studies provide a concise plan, a clear presentation of options and the basis for future investments. A site master plan is an important basis in order for an industrial company's management to get an overview and a detailed analysis of the impacts of potential future scenarios.

It is a reliable business process which summarizes and analyzes the options, and assesses opportunities and risks in terms of both investment costs and life cycle costs. A site roadmap is usually made with a 10-year-perspective in mind. WSP has developed a methodology for site master plan studies which streamlines working structures, and that can be tailored to customers' requests.
